Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 3,6-8,11 and 12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 3,6-8,11 and 12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 03 January 2002 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 6-8, and 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Callahan et al, US Patent 6,624,873 in view of Abel et al and further in view of Fujimori, US Patent 6,026,169. Callahan discloses a surround sound processing apparatus for use with motion pictures (audio-visual production) comprising speakers L, LF_s, LR_s, R, RF_s, RR_s (three speakers along a periphery of the viewing audience) in figures 4 and 5. Callahan does not disclose panning an audio stream between the speakers. Abel discloses a surround sound panner comprising a plurality of speakers 902-906 having a panning law 803 which varies the gain between speakers. It would have been obvious to one of ordinary skill in the art at the time of invention to utilize the panning technique (in a front to back direction), as taught by Abel, in the apparatus of Callahan for the purpose of improving the realism of motion pictures. The combination of Callahan and Abel does not disclose that the panning also involves delaying the audio stream transmitted to each speaker by an amount that varies along with the panning gain. Fujimori discloses a sound image localization device comprising delay circuits 1 and 2 and variable gain circuits 3 and 4. A sound source is panned (localized) in a certain position through the use of time difference and amplitude difference. Thus, it was well known that delay circuits could be used in addition to gain circuits for the purpose of panning audio sources. Therefore, it

would have been obvious to one of ordinary skill in the art at the time of invention to modify the combination of Callahan and Abel by including delay manipulation in the panning law, as taught by Fujimori, for the purpose of further improving the realism of moving sound images for motion pictures. Claims 3, 6, 7, 11 and 12 are met. As to claim 8, it was well known in the art of spatial audio to include information of the processing of the audio along with the audio stream, as for example, in video games.

Response to Arguments

Applicant's arguments with respect to claims 3, 6-8, 11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
